

# OrthoSave<sup>®</sup>

D V T

## PROTECTION AGAINST BLOOD CLOTTING

This DVT prophylaxis system is a clinically effective, non-invasive method for decreasing the risk of deep vein thrombosis, while posing none of the bleeding risks associated with pharmaceuticals.

## AUGMENT YOUR POST-OPERATIVE PATIENT CARE WITH ORTHOSAVE<sup>®</sup> DVT

### CLOTS CAN DEVELOP WITHIN 2 WEEKS OF SURGERY

Encourage your patient to leave the hospital with compression therapy to protect against DVT/PE.

### DVT/PE: UNDER DIAGNOSED/ RECOGNIZED CONDITION

Only about 1 in 10 Americans know about DVT and are familiar with its symptoms and/or risk factors, and only about six percent of Americans know what it is and that it can be prevented.

### DVT CAN OCCUR IN ALMOST ANYONE

Certain individuals may be at more of a risk for developing DVT, although DVT can occur in almost anyone. OrthoSave<sup>®</sup> DVT performs sequential compression, which promotes blood flow ultimately lowering your patient's risk of DVT/PE.

# OrthoSave®

D V T

Protect your patient throughout the course of therapy in safety and comfort with in-home pneumatic compression.

Minimize the risk of DVT/PE with OrthoSave® DVT within the first weeks following surgery.

OrthoSave® DVT performs sequential compression, which promotes blood flow ultimately lowering your patients' risk of DVT/PE.

## PHYSICIAN BENEFITS

### IMPROVED OUTCOMES

Studies show that use of post-surgical compression therapies similar to the OrthoSave® DVT results in better protection from DVT blood clots.

### COMPREHENSIVE SERVICE

Our best-in-class service providers deliver or ship (per base protocols) right to military personnel residences, train military patients in the proper prescribed use of therapies, and offer support 7 days a week during the course of treatment, while taking care of insurance claims on their behalf.

### PEACE OF MIND

Mechanical DVT prophylaxis effectively protects patients against post-surgical blood clots, whether used alone or as an adjunct to other prescribed medication.

## PATIENT BENEFITS

### REDUCED PAIN WITH LESS MEDICATION

Patients regularly experience less pain in compliance with OrthoSave® DVT therapy, resulting in less reliance on oral medication.

### IMPROVED SAFETY

The OrthoSave® DVT offers a smaller detached rechargeable DTV unit for comfortable use throughout the day.

### COVERAGE

Reveille therapies are covered benefits as per Tricare Online Manual Chapter 4 Section 6.1 Musculoskeletal System. There is no cost to active duty personnel as per DOD regulations. This allows us to deliver our best-in-class equipment directly to your patients' homes at no cost to them.
